

# PGx Panel

# Twist Alliance Long Read PGx Panel

- ~99% of adults have an actionable PGx variant (US, UK Biobank studies)
- ~50% of US adults are prescribed a drug for which there are CPIC guidelines
- > 100K adverse drug reactions per year in the US costing >\$30B

## Panel design

49 genes - 2 Mb target region  
 39 full-length genes enable phasing  
 Includes all 20 genes with CPIC guidelines

Pairs with the Mitochondrial Panel
